External Command Room: From the White House to the Borders

Why the Coup Failed (1): Weaknesses of the Enemy Front

1

Haste in Execution

Lack of full operational preparation due to rushing to exploit domestic preferential currency reforms.

2

Historical Hatred of the Nation

Deep public disgust toward the MEK and monarchist factions.

3

Fragmentation of Opinions

Severe internal conflicts and paralyzing power struggles within the opposition coalition.

Why the Coup Failed (2): System's Intelligence and Stability

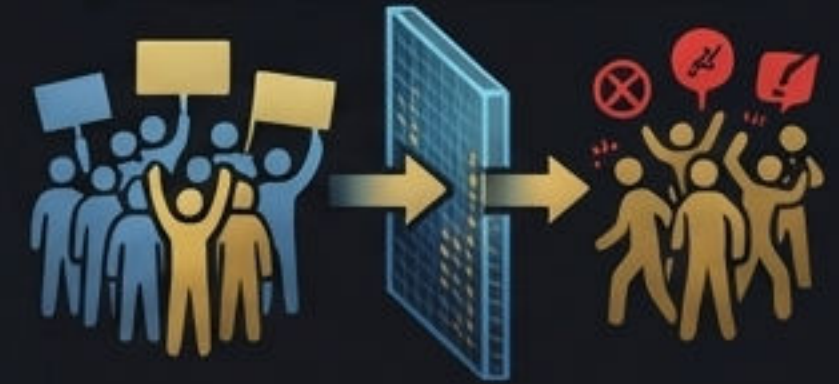

Political Unity

Total absence of rifts between the government and parliament.

Smart Management

Surgically separating genuine protesters from violent rioters.

Security Authority

Decisive kinetic action against terror + maximum restraint and leniency with the public.

Active Diplomacy

Standing firm and unyielding against direct US military threats.

End of the Illusion: Failure of Hybrid War

The events of January 2026 proved that even when combining the brutal ground tactics of a "New ISIS," unprecedented "Cyber Warfare," and massive "Foreign Pressure," the internal cohesion and security vigilance of the state form an impenetrable barrier.

**The enemy was "victorious" in virtual space,
but utterly "defeated" on the ground of reality.**
